Progetti Abitativi LAB

**WHEN
BIO MEETS DESIGN**

ABOUT US

With more than 30 years of experience in production and design of furnishings, we wanted to dedicated ourselves to a new way of building, renovating, and furnishing: the eco-sustainable one. We rely on leading companies in this sector, and in our showroom you can find an exhibition area completely dedicated to green building and green furniture. Because we and our home can change the world too. Here are some of our offers.

Furniture

We offer a wide choice of furnishings in various styles for all living areas, opting for sustainable choices. Our partner companies have received certifications that attest to their attention to the environment. Even the artisan offer is careful to reduce emissions and to use sustainable products: an example is lime lacquering for kitchens and doors in general.

The House that Breathes

Green Building

Building or renovating in lime and hemp offers countless advantages: it guarantees thermal insulation with consequent energy savings, it is fireproof and returns more oxygen to the environment than the CO2 emitted.

Stabilised and Natural Greenery

It is a technology that allows to bring nature where it would be impossible.

In addition to beautiful walls, it guarantees regulated humidity, purified air, energy savings and acoustic improvement.

Bio-Pools/Bio-Ponds

Water filtration occurs naturally, without the intervention of chemicals thanks to aquatic plants which, in addition to having a decorative use, determine the biological balance of the system while maintaining a correct pH.

Vaults

Custom construction of vaulted ceilings of any shape, covered in brick, natural stone, with a lime finish or simply in concrete.
