

Example of photorealistic planning

Innovations that we propose

We think we are a novelty for the set of innovative and traditional services, that we propose on a single company.

- photorealistic 3D planning
- carpentry
- professional figure that coordinates the design of house with unitary logic
- proposals for the most varied and innovative, traditional and handmade, ecological and futuristic materials and furniture.

About us

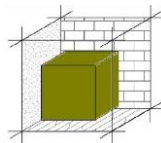

We have created this modern and innovative company to meet costumers' specific demand thanks to our 30 years' experience in the design and decor production. Certainly, it is a furniture workshop, but not only that. Our professional staff is ready to propose the most renowned branded furniture. From basement recreation room to attic, from classic to contemporary décor, up to more specific décor like home cinema and fitness area. We follow the planning of the various living spaces down the last details with latest technological instruments.

Kitchens. We offer the best value for money. You can find **Key** with its design of refined Italian beauty and **Nobilis** with its ergonomics and German design. We also propose **handmade kitchens**, that are available in a wide range of wood, styles and colours. It is important our real consultation regarding the choice of the work surface.

Living area. Bespoke products, but also furniture, sofas and armchairs from **historic Italian firms**. We follow the central idea on the basis of the materials and styles selected. We elaborate **alternative solutions**, for example the use of plasterboard in order to create pieces of furniture.

Sleeping quarters. From the easiest to the most complex proposals. We make room for the planning of **multifunctional walk-in wardrobe** and the proposals regarding beds, bed bases, mattresses.

Bathroom. Sanitary waves with **new technological devices** from the most important firms. We can propose sinks made of ceramic, stone, crystal, Corian, Betacryl, quartz, steel and iron.

'Much of the character of everyman may be read in his house.'

John Ruskin

Technological innovations like **home automation, lighting technique, green spaces with stabilized plants, wellness, acoustic design, olfactory design**. For spaces where physical well-being, emotional impact and energy efficiency are crucially important. In addition, we propose particular materials to the realisation of floor and cladding. It is possible to see it in our showroom.

Outdoor furniture. Living room in several materials. **Outdoor kitchens** and related dining area, outdoor shade structures, braziers, **wellness**. We also deal with lighting and acoustic design.

In our **bioarchitecture** office in Alba, we build or restructure a building by thinking of the needs of the environment, too. We focus on energy saving, combining living comfort and environmental protection. We use natural, recyclable, eco-friendly materials.
